Gabriel de Albuquerque

Software Engineer · CTO at Acctsy

gabrieldealbuquerque1@gmail.com

GitHub LinkedIn Portfolio

EXPERIENCE

Acctsy · CTO

Current role

- Development of accounting SaaS, from architecture and APIs to interfaces and infrastructure, with multi-tenant isolation and asynchronous processing.
- AI integration for document processing, financial analysis and reporting, using prompt engineering and RAG.

Meridian · Full-stack development

Custom software development for clients. For TOV, a law firm, contributed to the corporate website and the article publishing dashboard.

SELECTED PROJECTS

Rental price prediction in Greater Vitória

Python · XGBoost

AI model combining feature engineering, property-grouped validation and adjustments based on comparable properties. **Highest accuracy in the class in the final evaluation.**

Deadlock detection with eBPF

C · eBPF · Docker

Instrumentation of TCP services to detect wait cycles and recover communication without restarting processes.

UFES GameLab

Lua · Roblox Studio

Contributed to map creation, gameplay mechanics and the random spawn system for a game developed as a team.

TECHNOLOGIES AND SKILLS

Backend & web	Python, FastAPI, Node.js, TypeScript, React, Next.js, PostgreSQL and Redis.
AI & ML	LLM integration, RAG, prompt engineering, model training, XGBoost and fine-tuning.
Infrastructure	Docker, Docker Compose, Linux, Git, Nginx and Coolify.

EDUCATION

Computer Science · UFES

Expected graduation: late 2027

Federal University of Espírito Santo · Undergraduate degree in progress.
